

March 18, 2020

To Our Valued Patients:

For the health of our patients, staff, and their families, we will be following the CDC's recommendations that eye care providers close their offices for at least 14 days for patients seeking routine eye care beginning Friday, March 19 due to the coronavirus (COVID-19) outbreak. We will still be available to treat patients needing necessary services and emergency eye care.

If you are currently scheduled for an appointment, you can expect to receive a phone call from our office to discuss your appointment and if it is necessary during this time. It is our hope to return to see regularly scheduled appointments on Monday, April 6. However, please realize that this date may change as the situation evolves. Please check our Facebook, website, and your e-mail for updates.

Please note that while the office is closed for routine appointments, we will be available by phone for eye emergencies, to schedule an appointment for glasses to be dispensed, and for any questions related to your eye care.

We will continue to monitor the situation and rely on the information provided by the CDC. We recognize this may cause an inconvenience in your schedule, but we ask for your patience and understanding as we all navigate this evolving situation.

Thank you for your understanding,

Eaton Rapids Eye Care Doctors and Staff
